Maintenance Notes & Updates

Just a few tips and info here. Please do not use the pucks in your toilet tanks. They are concentrated with chlorine and eat away at your flapper valve. Also another change you may have noticed is that maintenance has started changing filters every six months versus three. The filters looked brand new after only three months, so we are giving this a try.

The Village Roof Replacement has been completed, and soon the painting & gutters will be too. Thank you all for your patience. Also, I would like to give a big shout out to USAA. Their grant enabled AFEV to purchase the new LED lighting going up around the campus. Another big project on the horizon will start on February 1. RED HORSE will be installing a sidewalk to go parallel with the road on the west side of campus near the maintenance building. In addition, they will also make a parking lot for the maintenance personnel's POVs, which will leave the road clear of hazards.

Finally, when submitting a maintenance request, please make sure to indicate whether the maintenance technician is authorized entry without the resident(s) being home. If left blank, we will not enter which could delay your request from being completed.
